OUTBACK

An aluminium "Clam-shell" design that comes in two options:

1. A slimline design that adds only 190mm to the roof clearance
2. An Aero shaped design which allows more bedding to be packed (an extra 100mm higher)

Pop two clips and she opens up with gas struts – really painless.

The tent is fitted with a pair of tracks allowing for the fitment of additional light weight baggage (solar panels, bicycles, canoe, surf board, etc.) An optional external ladder is also available.

A simple and sturdy mounting kit is available to mount your Ostrich Wing Awning directly to the tent. Either white or flat colour coded to suit your vehicle.

The ideal solution for the traveller who wants to avoid the normal hassle of making and breaking camp.
